**John P Behringer**      [john.behringer@rsmus.com](mailto:john.behringer@rsmus.com)  
**Partner, RSM US LLP**    312.634.5905

John is the National Financial Institutions Sector leader for RSM and serves as the Risk Consulting Financial Services Industry leader. He has over 20 years of experience working exclusively with financial institutions ranging from community banks to some of the largest global banks in the world. John is recognized for his deep subject matter expertise in the areas of credit and operational risk and controls over financial reporting along with his experience assisting clients with M&A transactions and remediation and resolution of regulatory matters.

## **Bill McDonald, CEO and Chairman** **Greenwoods State Bank**

Bill has been in the business of banking since 1985. After 25 years of experience in public accounting, Bill joined the Greenwoods team in June of 2010. Since, he has expanded Greenwoods to become the bank Southern Wisconsin knows and trusts. Bill is the frontrunner of a growing and dynamic financial institution that is a premier bank for entrepreneurs. He has made sure that Greenwoods will always be the bank that has a brilliant team, while remaining personally accessible in a moments notice.

# FINTECH AS A MOVEMENT

---

# FinTech as the driver for automation

## FINTECH COMPANIES ARE TRANSFORMING THE FINANCIAL SERVICES INDUSTRY

### Fintech disruption

**\$100B** is invested globally in fintech today compared to **\$12.6 billion** in 2010.

(Source: PitchBook)

### Fintech investments across U.S. financial services sectors continue to rise significantly

(Source: PitchBook, as of June 30, 2021)

**The payments sector is leading fintech disruption**

**88% of U.S. consumers use fintech in 2021** compared with only **58% in 2020**. More Americans now use fintech than they do video-streaming subscriptions (**78%**) and social media (**72%**).

(Source: Forrester, according to "Q4 Annual Report")

## Traditional players

### Market share for conventional banks continues to decrease

In October 2020, conventional banks accounted for **72%** of the **total market value of the global banking and payments industry**, down from **82%** in Jan. 2020 and down from **96%** in 2010.

(Source: the Economist)

Only **43%** of banks believe they **effectively serve millennial customers** between **25 and 40 years old**.

(Source: Bank Director)

Banks have **increased** their technology spending by a median **10%**

but **50%** are concerned they **aren't effectively using** and/or aggregating data.

(Source: Bank Director)

## FINTECH AS A MOVEMENT

And how to build a road map for the path forward

Does the company have a digital agenda and/or strategy?

Build, buy or rent? Assess options for responding to disruption, whether through building fintech solutions internally, making strategic acquisitions or partnering with fintech companies.

Are there segments of the business that the company wants to heavily digitize?

Does the company have a chief digital officer or customer experience officer who can address the long-term sustainability of the business?

How is the company evolving to meet customer demands and stakeholder needs more broadly?

*"When most people think about fintech, they think about startup companies disrupting the landscape of financial services," says Peter Brady, RSM US national financial services leader. "And while that's true, the bigger story is in how the landscape is responding to the fintech companies."*

# Digital transformation hurdles

According to a report by Genesys and BankingDive, bank respondents indicated the following as the biggest hurdles to digital transformation:

# Proven automation technologies

- A set of modular software programs (or “bots”) to complete structured, repeatable, and logic-based tasks by mimicking the actions taken by existing human staff.

- Software that easily preps, blends, and analyze all of their data using a repeatable workflow, then deploy and share analytics at scale for deeper insights

- Software that combines OCR & Computer vision to extract data from structured and semi structured documents.

**Robotic Process Automation**

**Procure to Pay / AP Automation**

**Expense Automation**

**Close Automation**

**Document Extraction Automation**

**Data Blending**

- AP automation automates the process from invoice receipt to payment processing with supporting workflows
- P2P automation focuses on PO through requisitioning processing

- Software to streamline and automate employees turning in expense reports and how you approve, review, archive, and manage them.

- Software designed to automate and control the entire financial close process.

# THE DIGITAL TRANSFORMATION JOURNEY

---

# Considerations for effective automation and digital transformation

- What are we trying to accomplish?
  - Does automation reduce friction resulting in improved customer/user experience?
  - What is the associated market opportunity or efficiency gain we capture?
  - Are we automating a bad process?
- What is the ROI?
  - New business or increased profitability
  - Improved efficiencies and risk mitigation
  - Higher level of customer/user satisfaction
- How viable is the proposed project/change?
  - Will our customers engage?
  - Will our employees adopt? Is it too much change at once?
  - How does this fit into our current process/workflow/culture?
  - Can we manage the growth?

# Where to begin your digital transformation journey

## Building an effective digital transformation strategy

Many institutions struggle with digital transformation due to the lack of an effective strategy. A common struggle is due to a lack of governance over the transformation process. A solution to this common challenge is to establish a digital transformation strategy that governs the institution's process for evaluating, prioritizing and executing digital transformation projects.

The use of a model transformation framework, as outlined below, provides an excellent starting point for identifying and evaluating digital transformation opportunities, wholistically, across the enterprise.

Customer Experience	Financial Reporting	Compliance	Credit and Loan Ops	Retail
<ul style="list-style-type: none"><li>• Self-service</li><li>• Account updates</li><li>• Mobile banking</li><li>• Call center</li><li>• Fraud prevention</li></ul>	<ul style="list-style-type: none"><li>• Reconciliations</li><li>• Journal entries</li><li>• Regulatory reporting</li><li>• Payables</li><li>• Expense reimbursement</li></ul>	<ul style="list-style-type: none"><li>• BSA/AML</li><li>• Lending compliance</li><li>• Deposit compliance</li><li>• Fair lending</li><li>• CRA</li></ul>	<ul style="list-style-type: none"><li>• Loan approval</li><li>• Application status</li><li>• Servicing</li><li>• Underwriting</li><li>• Loan monitoring</li></ul>	<ul style="list-style-type: none"><li>• Online account opening</li><li>• Wealth management and trust</li><li>• Digital assets</li><li>• Business banking</li></ul>

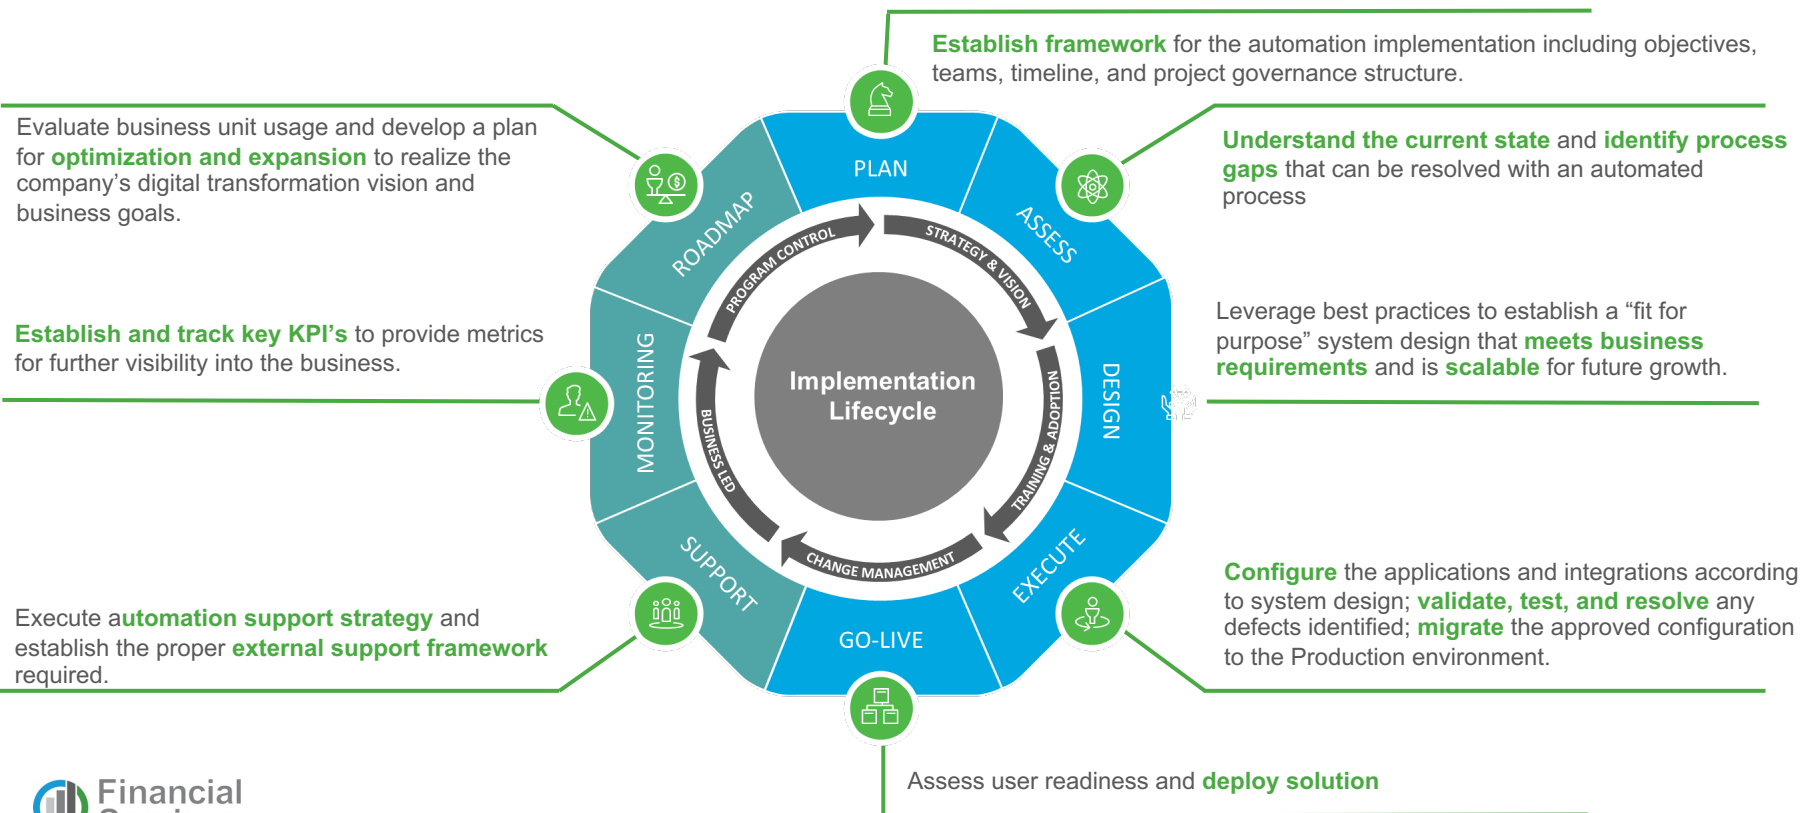

# Key questions to consider when evaluating process automation

- Does the process require a high volume of manual tasks or multiple parties to execute the tasks?
- Require use of spreadsheets or documents?
- How does task hand-off occur between parties?
- Is the current process prone to errors?
- Does the process require a complete and accurate audit trail for record keeping and compliance?
- Are tasks associated with the process time-sensitive or have an impact on other processes/systems?
- Does the process lack standardization and transparency?

# Automation development and implementation framework

# EQUIPMENT FINANCE USE CASE

---

# Equipment finance case study

## Client Challenges/Issues

## Key Activities Performed

## Impact & Results

## Key Capabilities

**Broker and Salesperson Portal:** Create Equipment Financing Application, Create Vendors, and fix applications requiring attention.

**Approval Workflows:** Route application or newly created vendors for approval.

**Automatic Credit Score Retrieval and decisioning:** Integration with **Equifax** and **PayNet** allows for auto credit report and score retrieval and decisioning based on score.

**Automatic Loan Packet Generation and Routing Via DocuSign:** Auto generate Loan funding packet upon approval and route via **DocuSign** for borrower signature.

**Loan Boarding:** Simplified loan boarding with screen that presents all data that is required to be entered in **Fiserv** for boarding. Embedded integration for automatic Loan Boarding to Fiserv.

## Business Value:

- Promoting data integrity and accuracy upfront
- Allowing the system to define borrower Tier
- Allowing the system to define data and documentation requirements
- Full view into the application history
- Centralized document retention associated to application
- Streamlining the down stream credit decisioning process by providing complete applications
- Commenting for additional context

## Key Controls:

- Vendor approvals for new vendors
- Sales personnel cannot approve applications they have submitted
- Audit history into all actions and comments made to the application
- Returning customer check to prevent duplicative borrower entries
- Data validations on text entries

## Business Value:

- Centralized view of all data points for speed to decision and minimized data entry
- Automatic credit score and report pulls
- Central point of access for all associating documents
- Audit history
- Ability to send back application for re-work or more information, limiting external communications
- Automatic decision notification to sales representative

## Key Controls:

- Credit Analysts are assigned individual review tasks and no two can work on the same task
- View of total approved exposure amount by borrower across all applications
- Ability to re-assign tasks as necessary
